Cefla NA Announces exocad's Implant Planning Software *exoplan* Now Available with NewTom Scanners

May 18, 2021, Charlotte, NC — The Medical Business Equipment Unit of Cefla North America is pleased to announce its cooperation with exocad America, an Align Technology, Inc. company, to offer exocad's *exoplan* as an integrated implant planning software solution for NewTom CBCT scanners for 2D/3D imaging.

exoplan is a powerful implant-planning and surgical guide design software – created by exocad to provide dental labs, dentists, implant specialists and surgeons with maximum flexibility and precision. Based on the renowned exocad platform, *exoplan* delivers a seamless digital workflow and the highest usability and performance.

NewTom delivers innovative CBCT technology and outstanding efficiency packed into a powerful, versatile device, ensuring superb performance in every situation. Customers can choose the NewTom Go, NewTom VGi evo or GiANO HR, each with several upgrade options that can be configured based on the desired indications.

“exocad provides ease of integration, a robust platform, and a built-in communication platform that enables dentist-to-lab collaboration and surgical guide creation,” says Dan Konicek, national sales director for Cefla NA, about the resulting benefits for dentists.

Customers can order *exoplan* implant planning software together with any of these scanners. The system is delivered fully integrated, configured, and ready to realize dentists' treatment planning needs. Larry Bodony, president of exocad America adds, “We're excited to partner with Cefla to bring this simple and highly capable planning solution to their customers.”

###
